

# schülke -†

A body wash lotion based on selected skin-care substances and gentle surfactants, with particularly good skin tolerance.

## esemtan® washlotion

### Our plus:

- universally usable – for the whole body, face and hair
- for all skin types and for the skin of babies and old people
- with sodium lactate in order to maintain natural skin moisture
- maintains the antimicrobial effect of the skin's protective acid mantle
- pH neutral for the skin and soap free
- also for sensitive and stressed skin
- with allantoin

### Uses

- For gentle body washes from head to foot
- For showering, partial baths and full baths
- For hand washing with surgical and hygienic hand disinfection

### Instructions / Methods of use

esemtan® washlotion was developed for gentle hand and body washing, and can be used:

- for all skin types, including the skin of babies and old people
- for thorough and gentle hand washing in surgical and hygienic hand disinfection with alcoholic rub-in preparations
- for gentle body hygiene/cleansing when showering or in partial and full baths, even in cases of hypersensitivity to soap
- for mild and gentle washing of patients before surgery
- for cleansing in cases of incontinence, prolonged confinement to bed, in cases of pruritis ani and vulvae

- for the prophylaxis and support of therapy in infant dermatitis and eczema of the anal and genital areas
- for washing amputation stumps and for the support of infection prophylaxis and prevention of recurrences and secondary infections
- for deodorising in cases of increased perspiration and body odour due to illness
- for mild and gentle washing of the face and hair
- for general, occupational dirtiness

### Use concentrations / Contact times

- Before surgical and hygienic hand disinfection with alcoholic rub-in preparations, apply approx. 2 ml esemtan® washlotion via a wall dispenser, add water to form a lather, rinse off and dry well (repeat the process in cases of very heavy soiling)
- For washing, apply esemtan® washlotion to a moist sponge or face-cloth, rub on to the relevant parts of the body, wash and rinse off
- For whole baths, depending on requirement, add approx. 20 ml esemtan® washlotion as the water runs into the bath; for partial baths use correspondingly smaller amounts

# esemtan® washlotion

## Product data

Composition:

Ingredients: Aqua, Sodium Laureth Sulfate, Sodium Chloride, Lauryl Glucoside, Glycol Distearate, Stearamide MEA, Cocamide DEA, Allantoin, Parfum, Phenoxyethanol, Benzoic Acid, Dehydroacetic Acid, Ethylhexylglycerin, Poliaminopropyl Binguanide, CI42090, CI47005, Benzyl Salicylate, Hexyl Cinnamal

As a result of the balanced mix of the various ingredients, esemtan® washlotion has skin-care properties. The gentle lather and pleasant fragrance and the delicate opalescent green colour, round off the positive properties of the product.

- Allantoin, a substance with anti-irritant properties that occurs widely in the animal and plant world, protects the skin against irritation.
- Sodium lactate, a biological skin moisturiser, keeps the skin soft and smooth, and prevents it from drying out.
- Protection and care of the skin are potentiated by emollient substances.

## Chemical-physical data:

Appearance:	delicate opalescent green
pH-value:	approx. 5.0 (skin neutral)
Viscosity (20 °C):	approx. 1,300 mPa*s

## Environmental information

Schülke manufactures products economically and with advanced, safe and environmentally friendly production processes while at the same time maintaining our high quality standards.
