Virucidal against enveloped viruses (incl. HIV, HBV, HCV) concerning RKI-recommendation Bundesgesundheitsblatt 01-2004	30 sec.
<i>Vaccinia viruses</i>	30 sec.

* Phenols have been used as ingredients in disinfectants for more than 100 years, as they possess antimicrobial properties. One of the most important phenols is 2-biphenylol, a substance that, among other things, is approved by the WHO for the preservation of citrus fruits, i.e. is a substance used in the proximity of foods. Phenol is exceptionally well tolerated by the environment, and is safe in use, provided that the preparations are used as instructed.

Labelling according to EC-Directives

- R11:** Highly flammable.
- S7/9:** Keep container tightly closed and in a well-ventilated place.
- S16:** Keep away from sources of ignition – no smoking.

desderman® gel

Special notes

Flash point 16 °C (acc. to DIN 51 755).

Do not use near ignition sources.

Do not use after the expiry date.

Use disinfectants safely. Always read the label and product information before use.

Packaging information

desderman® gel is supplied in bottles, canisters and a container. The bottles, canisters and containers are made of polyethylene (HDPE) and are labelled accordingly. The closures are made of HDPE (exception: 1-litre bottle: PP). The labels are made of PE. Sorting is therefore possible for optimum recycling. The 500 l container is a multi-way container made of stainless steel.
