

Oil-in-water emulsion to protect and nourish especially exposed skin.

esemtan® hand emulsion

Our plus:

- hand emulsion is quickly absorbed by the skin
- protects and nourishes the hand by means of allantoin and bisabolol
- pleasant scent thanks to discreet perfume

Product features

- easy-spreading
- does not affect the disinfection effect, e.g. during hand disinfection

Application areas

- Rub it in gently to protect the skin before and, if necessary, after skin-stressing activities.
- If required, it can also be rubbed in gently to nourish the skin.

Application methods / indications

Apply esemtan® hand emulsion to the back of one hand and spread it, first from one back to the other back of the hand and then also to the palms of the hands.

In order to ensure a hygienic use, using dosing pumps or dispensers is recommended

How to cream your hands properly

- For hygienic reasons, the product should be extracted via pump or dispenser.
- Rub the product gently into clean/dry hands.

- Apply the product to the back of the hand and spread the cream with the other back of the hand.

- Afterwards, also use fingers and, finally, the inner side of the hand to spread the cream.
- While rubbing it in, pay special attention to the space between the individual fingers and to the nail bed.

Schülke & Mayr GmbH is certified according to DIN EN ISO 9001, DIN EN ISO 14001 and DIN EN ISO 13485 (Reg.-No. 004567-MP23) and has a validated environmental system in accordance with the Eco Audit Regulation (Reg.-No. DE-150-00003).
