

schülke -†

Oil-in-water emulsion for daily hand and body care.

esemtan® skin balm

Our plus:

- based on skin-care substances
- provides the skin with oil and moisture
- permeates deeply into the skin
- oil-in water emulsion
- supports and cares for the skin

Uses

For daily use in care of the skin, to protect it from drying.

Application areas

For hand and whole-body care for all skin types. Apply esemtan® skin balm before starting working and after skin-stressing activities. Also suitable for children's skin.

Application methods / indications

Apply esemtan® skin balm to the skin and rub it in gently.

Apply esemtan® skin balm to the back of one hand and spread it, first from one back to the other back of the hand and then also to the palms of the hands.

In order to ensure a hygienic use, the RKI recommends using dosing pumps or dispensers.

dosing pump for 500 ml/1 l	180 303

Please find detailed information in the schülke preparation information "Accessories and Dosing Aids".

Recommendation for use

esemtan® skin balm is suitable for care of the hands and for general skin and body care, especially in subjects with seborrhoeic (oily) skin types. It is important to care for the hands well, e.g. after finishing an operation-programme, in order to prevent possible skin irritation. If required, especially at cold times of the year or after washing the hands, several times daily. For caring protection between tasks, esemtan® hand emulsion is recommended.

Packaging information

esemtan® skin balm is supplied in bottles. The containers are made of polyethylene (HDPE) and are labelled accordingly. The closures are made of HDPE (exception: 1 l-bottle: PP). The labels are made of PE. As a result, sorting for optimum recycling is possible.

Reports

Report on the skin compatibility of esemtan® skin balm (formerly sagrolind® P)

Dr. med. H. Ippen, Göttingen, 13.03.1996

Environmental information

schülke produces its products according to advanced, safe and environmentally friendly procedures, economically and in compliance with high quality standards.
