

Ready to use peracetic acid solution using vaporisation technology for bio-decontamination of surfaces

## perform® select soproper

### Our Plus

- Ready to use
- Residue free after vaporisation
- efficacy tested according to European norms (EN)

### Application areas

Bio-decontamination of isolators and material transfer chambers by vaporisation technology.

### Instructions for use

Vaporise perform® select soproper undiluted. Quantities and times are to be validated on site. Surfaces should be precleaned. Please follow isolator or material transfer chambers manufacturer's instructions.

Leaves no residues on disinfected surfaces.

Microbiological effectiveness is extremely comprehensive (incl. spores) and depends on the vaporisation technology used.

Application parameters including required contact time are dependent upon the vaporisation technology used and are determined by the local conditions of the area to be disinfected, such as size, fittings, temperature, atmospheric humidity.

### Microbiological efficacy

Efficacy	Concentration	Contact time
<b>bactericidal</b> EN1276, EN13697	ready-to-use 20 °C	30 sec.
<b>fungicidal</b> EN1650, EN13697	ready-to-use 20 °C	30 sec.
<b>sporicidal</b> EN13704	ready-to-use 20 °C	30 sec.

## Product data

### Composition:

100 g solution contains the following active substances: 3.5 g Peracetic Acid

### Chemical-physical data

Color	colourless
Density	1,075 g/cm <sup>3</sup> / 20 °C
Flash point	> 100 °C
Form	liquid
pH	< 1 / 20 °C
Viscosity, dynamic	1,54 mPa*s / 20 °C

## Special advice

**Use disinfectants safely. Always read the label and product information before use.**

Good material compatibility with stainless steel, IIR, PVC soft, SI, PEHD, glass, etc. Contact with non-ferrous metals (brass, copper) should be avoided. Recommended storage temperature 5 - 25 °C. Carry and store product container in an upright position.

## Information for order
