

schülke -t

hyclick® dispenser, suitable for specialised 500ml and 1.000 ml bottles with a built-in hyclick® pump

For the application of wash lotions and hand disinfectants

Be safe, it's easy

Our Plus:

- one-click system for an easy and fast bottle change
- optimal protection against contamination
- minimal cleaning thanks to the curved design
- adjustable dosage: approx. 1.5 ml and 3 ml
- easy installation

Description

Easy and exact dosage of wash lotions and hand disinfection products. Adjustable dosage allows the desired amount to be dispensed.

Change of bottle

When changing products, only the disposable bottle needs to be replaced.

Operating lever

The lever can be operated with the elbow or forearm. To change the bottle simply lift the lever and change, with one click, with one hand.

Cleaning and disinfection

The dispenser can be disassembled without tools. The smooth design enables easy cleaning and disinfection with e.g. mikrozid® universal wipes.
