sensiva®

... and your skin is protected and
nourished on a daily basis.

Skin protection and care
for healthcare staff

the plus of pure
performance

sensiva®

Take care of your hands and they'll take care of you.

Skin protection and care
for healthcare staff

Safety and care – no hand should go without it!

sensiva® – to protect and nourish your hands during every day medical care.

Perfumes and colours – Why have any unnecessary risk factors in your daily work?

Working with patients every day – it's a job with a lot of responsibility and commitment. Skin is subject to a great deal of stress on a daily basis and hands are at great risk of becoming dry and cracked. Your hands are your most important 'tool' and they need special protection and care. Day after day.

It's not just a matter of caring for stressed hands but also of protecting them from unnecessary allergies, such as to perfumes and colours. Skin disorders on the hands are among the most common occupational illnesses and now make up 57 % of all occupational illnesses.*

Colour and perfume – Risk factors for your skin!

The sensiva® product range gives you a perfectly coordinated system to protect and care for your hands which is completely free of any colours and perfumes and leaves your skin feeling good at the same time. All of our products are enriched with valuable skin care and skin protection ingredients which provide your skin with long-lasting protection and care.

sensiva® – to protect and care for your hands.

Hamamelis extract

Hamamelis extract – protects the skin against external influences, anti-inflammatory effect and helps to increase the density of the skin.

Allantoin

Allantoin – has a soothing effect, provides moisture and supports cell renewal.

Panthenol

Panthenol – enhances the regeneration of the skin and soothes skin irritations. Improves skin suppleness and smoothness.

Sheabutter

Sheabutter – restores the suppleness of the skin and regulates the moisture balance.

Jojoba oil

Jojoba oil – preserves the protective layer (hydrolipidic film) of the skin through a balanced supply of fat and moisture.

- contains Jojoba oil and bees wax

Skin protection

Hand disinfection

desderman® pure

- gentle caring disinfection of skin
- extensive efficacy spectrum with virucidal activity
- norovirus efficacy tested within hygienic hand disinfection
- excellent skin compatibility and pleasant skin feeling due to an established system of refatting agents
- colour- and perfume-free, therefore hypoallergenic

Hand disinfection

Use disinfectants safely.
Always read the label and product information before use.

Effectively prevent cracked or chapped skin and eczema.

When external or internal influences irritate the skin, that is, when it is excessively stressed, the skin's own regeneration mechanisms are overburdened.

Then our skin reacts in noticeable ways: It itches, becomes rough, flaky or even chapped. As a result, skin disorders can occur. Approximately 90 % of these involve eczema and another 10 % involve inflammatory, non-infectious diseases of the epidermis and the upper dermis. Regular preventive measures are the best protection against skin irritation and the allergic contact eczema which often follows.

The following measures help successfully prevent heavily stressed hands from developing skin disorders:

- special skin protection / wearing gloves (preparative)
- targeted and gentle skin cleansing
- effective skin care (reparative)

Each of these components is equally important for skin protection.

hyclick[®] system

Be safe, it's easy!

Remarkably easy: the brand-new hyclick[®] dispenser

- the pump and bottle are firmly combined to become one
- bottle change is easier than ever before and the risk of cross-contamination reduced
- effective protection against contamination

A new bottle with pump is used every time the bottle is empty – resulting in an effortless bottle change.

The 'first-opening' red safety clips ensure safety and security.

'First-opening' clip:
Optimal protection against
contamination.
