

Wash mitts for cleaning and care of the skin.

octenisan® wash mitts

Our Plus

- especially gentle to skin
- ready-to-use, no rinsing required
- easy application due to practical mitt dimensions
- colour and perfume free
- for MDRO decontamination

Application areas

- for bedside washing of whole body
- especially suitable for use on patients in intensive care or high dependency units
- cleaning and care of skin
- for whole body washing in case of MDRO

Instructions for use

If required, the packaging can be heated in the microwave (30 seconds / 600 W) or cooled in advance for refreshing washing. Open the softpack cautiously and take out an octenisan® wash mitt, as required. Clean the skin and leave the impregnation solution on for at least 30 seconds.

Make sure the skin is completely moistened, especially in the area of the armpits, areas between the fingers and between the toes as well as other skin folds. Rinsing afterwards with water is not necessary.

For regular hair washing we recommend using octenisan® wash cap. If the patients do not want to do without the feeling of classical hair washing, we recommend octenisan® wash lotion.

When using the product on a long-term daily basis, a regular washing with wash lotion and water (e.g. weekly) should be performed.

One mitt per body area (plus two mitts in reserve):

1. face, neck and breast
2. right arm and armpit
3. left arm and armpit

4. abdomen, front
5. right leg
6. left leg
7. back
8. abdomen, back

octenisan[®] wash mitts
