

# octenisan® wash cap protocol

## Step 1

If required, heat the pack in a microwave (for a maximum of 20 seconds at 600W).

## Step 2

Open the pack carefully.

## Step 3

If the wash cap has been heated check the temperature before fitting it on the patient.

## Step 4

Ensure hair is dry and untreated (no other hair gel, mousse, hairspray etc.)

## Step 5

Place the cap on the head so that the hair is completely covered.

## Step 6

Massage the solution thoroughly into hair and scalp and leave it for at least 5 minutes so that it can saturate the hair.

## Step 7

After each use, the hair can be rinsed with water and dried. This is optional and would only be for patient comfort if required.

## Step 8

Comb the hair as little as possible during the full treatment period (i.e. in between wash cap applications).

Please note:

It is not necessary to use the wash cap in conjunction with any additional agent. Other shampoos and hair care products can be used after thoroughly rinsing with water.

## What is octenisan® wash cap?

Disposable wash cap impregnated with octenidine based cleansing solution.

## How to use octenisan® wash cap?

Step 1 If required, heat the pack in a microwave (for a maximum of 20 seconds at 600W).

Step 2 Open the pack carefully.

Step 3 If the wash cap has been heated check the temperature before fitting it on the patient.

Step 4 Ensure hair is dry and untreated (no other hair gel, mousse, hairspray etc.)

Step 5 Place the cap on the head so that the hair is completely covered.

Step 6 Massage the solution thoroughly into hair and scalp and leave it for at least 5 minutes so that it can saturate the hair.

Step 7 After each use, the hair can be rinsed with water and dried. This is optional and would only be for patient comfort if required.

Step 8 Comb the hair as little as possible during the full treatment period (i.e. in between wash cap applications).

## Important:

Ensure that you are the **sole user** of the wash cap and that these are disposable after one use.

Ensure hair is dry and untreated (no other hair gel, mousse, hairspray etc.).

Remember to comb the hair as little as possible during the full treatment period (i.e. in between wash cap applications).

It is not necessary to use the wash cap in conjunction with any additional agent.

Other shampoos and hair care products can be used after thoroughly rinsing with water.

If you experience any difficulty in following this procedure, please seek help from a carer or healthcare professional.
