

Carbon Reduction Plan

Commitment to achieving Net Zero

Schulke & Mayr UK Ltd is committed to achieving Net Zero emissions by 2030

Baseline Emissions Footprint

Baselines emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Schulke UK Baseline Year: 2021
Additional Details relating to the Baseline Emissions calculations
Schulke & Mayr baseline is 2021. Scope 1&2 targets are market based
Baseline year emissions: 2021
EMISSIONS
Scope 1 – 4,835.30 metric tonnes of CO₂e
Scope 2 – 9,067.78 metric tonnes of CO₂e
Scope 3 – 304,611.13 metric tonnes of CO₂e Sources listed below <i>Transport & Distribution of Products</i> <i>Waste Generated in Operations</i> <i>Business Travel</i> <i>Employee Commuting</i> <i>Downstream Transportation & Distribution</i>
Total Emissions – 318,514.21 metric tonnes of CO₂e

Current Emissions Reporting

Reporting year: 2025
EMISSIONS
Scope 1 – 3,982 metric tonnes of CO₂e
Scope 2 – 3,054 metric tonnes of CO₂e
Scope 3 – 126,545 metric tonnes of CO₂e Sources listed below <i>Transport & Distribution of Products</i> <i>Waste Generated in Operations</i> <i>Business Travel</i> <i>Employee Commuting</i>

Downstream Transportation & Distribution

Total Emissions – 133,581 metric tonnes of CO₂e

- The global near term target of 1.5°C is aligned with and validated by Science Based Target Initiative (SBTi)

- Secured a gold score with Ecovadis* in 2023

*Ecovadis is a globally trusted provider of business sustainability ratings

Emissions Reduction Target

In order to continue our progress achieving Net Zero, we have adopted the following carbon reduction targets.

We can project that carbon emissions will decrease over the next three years by around 25% by 2028

Carbon Reduction Projects

Completed Carbon Reduction Initiatives

The following environmental management measures and projects have been completed or implemented since the 2021 baseline. The carbon emission reduction achieved by these schemes will be a significant reduction against the 2021 baseline and the measures will be in effect when performing the contract.

Schulke & Mayr UK has changed it's car fleet to an all electric fleet. We have moved from diesel cars and now have 11 vehicles running on all electric.

Schulke & Mayr GmbH is signed up to SBTi and committed to product carbon footprint analysis in an attempt to improve the carbon footprint at it's basic product level.

In future we hope to implement further measures such as:

Increasing our use of renewable energy at the manufacturing from 91.3% in 2022 to above 94%

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG reporting protocol corporate standard and uses the appropriate Government emission conversion factors for greenhouse gas company reporting.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard.

PUBLICATION: 14 May 2026

This Carbon Reduction Plan has been reviewed and signed off
