

4% soapy chlorhexidine antiseptic gel, for antiseptic cleansing of patients' skin

Bactiscrub

Our Plus

- Gel format
- The product remains on the skin, ensuring greater dermal absorption of chlorhexidine
- Contains no anionic surfactants
- The high concentration and variety of emollients ensure skin care
- Provides deep cleansing and skin protection

Application area

- BactiScrub is a 4% chlorhexidine soapy gel, designed for antiseptic cleansing of patients' skin.
- The gel formulation ensures precise dosing in every application, minimizing the risks of spills and splashes.
- Provides deep cleansing while caring for the skin

Product Profile

Biocide

Instructions for use

Antiseptic wash of the patient skin:

- Wet the skin ideally in the bath or shower.
- Apply undiluted directly to wet skin in a quantity sufficient to ensure even coverage over the entire body. Wash the whole body, avoiding contact with the eyes, ears, and mouth
- Leave the solution on the skin for about three minutes to ensure antiseptic absorption.
- Rinse off and dry the skin.

Once the skin is clean do not apply any other bathing products,

lotions, moisturisers or makeup, since they can reduce the effectiveness of chlorhexidine.

Product data

Composition:

4 % Chlorhexidine digluconate, 6 % Non ionic surfactants, csp
