

Additive for admixing with schülke surface disinfectants for additional cleaning of floor coverings.

s&m cleaning additive

Our Plus

- intensive cleaning effect, even removes disinfectant residues
- tested ability to mix with schülke surface disinfectants
- can be used for maintenance cleaning on all surfaces that can be wiped wet (floorings and inventory)

Application area

Additional cleaning of floors. As this product contains cationic active ingredients, the combination with cleaning agents, cleaning additives or wipe care products can affect the microbiological effectiveness and cause problems during application. schülke should therefore be consulted before attempting mixing the products.

Instructions for use

Depending on the type of floor, additional care may be useful. s&m care additive should be dosed from 0.25 % to 1 % depending on the desired optical effect and present degree of soiling. **Special advice**

Use the product with caution. Always read the label and product information before use.

The miscibility with schülke surface disinfectant preparations has been examined and tested from a microbiological point of view on the basis of the effectiveness requirements of the Association for Applied Hygiene (VAH). The preparation can be mixed with the working solutions of the following schülke surface disinfectant preparations: puresept® and terralin® protect. The mixing ratio should not exceed the selected concentration of the disinfectant. s&m cleaning additive should be dosed at 0.25% - 1% depending on the degree of soiling and the desired cleaning

effect. In conjunction with the well-known schülke surface disinfectant preparations, the s&m cleaning additive offers a system solution for floor preparation tailored to individual needs with regard to the desired effects: disinfection effect, cleaning performance and achievable visual appearance.
