schülke

Ready-to-use product for cleaning and disinfecting medical device.

mikrozid® sensitive wipes

Our Plus

- Suitable for alcohol-sensitive medical devices
- Suitable for sensitive medical devices
- Ready to use

Application area

The product is suitable for cleaning and disinfecting medical devices. Our specialist for sensitive surfaces impresses with its outstanding material compatibility.
Sensitive materials are very common in hospitals, which is why mikrozid® sensitive combines high efficacy with excellent material compatibility. Even ultrasound heads can be cleaned and disinfected*** with mikrozid® sensitive wipes.

Instructions for use

Thoroughly wipe the surface with the cloth and allow the active ingredient solution taking effect. Ensure complete wetting. Ensure that all visible dirt is removed before disinfection. Treat only small areas. The wiping area depends on the room temperature and the structure of the surfaces to be disinfected. Pay attention to hygienic aspects when opening and threading the first cloth. Make sure to close the lid after use. For professional use only. Any serious incidents related to the product are to be reported to the manufacturer and competent authority. Not for final disinfection of semicritical and critical medical devices! schülke guarantees a shelf life of 3 month after the package has been opened.

Refilling the box
Disinfect your hands first and put on a fresh pair of protective gloves and a gown. Ensure that the gloves are not contaminated by other activities during the filling process. Transfer the sticker with the expiry date to the dispenser box.

Unscrew the lid, place the refill bag completely in the dispenser box (if necessary, shape it to fit beforehand) and cut off the edge of the bag. Pull the pre-plucked cloth from the middle of the roll, thread it from below into the guide slot provided in the cover and pull it through. Disinfect the lid and screw it on. For high-risk areas, schülke recommends not using refill bags.

Microbiological efficacy

	Test method	Contact time
Bacteria, Yeast and Mycobacteria		
bactericidal	EN 13727 EN 16615	1 min.
bactericidal	in accordance with VAH guidelines with short contact times	1 min.*
yeasticidal	EN 13624 EN 16615	1 min.
yeasticidal	in accordance with VAH guidelines with short contact times	1 min.*
Virus		
virucidal against enveloped viruses	EN 14476	30 sec.
Norovirus (MNV)	EN 14476	15 min.*
Rotavirus	in accordance with DVV/ RKI guideline	30 sec.**
Polyoma SV40	in accordance with DVV/ RKI guideline	1 min.**

Product tested under dirty conditions.
*clean conditions
**in accordance with DVV/RKI guideline

mikrozid® sensitive wipes

Certificates / Norms

0297

Product data

Composition:
0.25 g Alkyl (C12-16) dimethylbenzyl ammonium chloride (ADBAC/BKC (C12-16)), 0.25 g Didecyldimethylammonium chloride (DDAC), 0.25 g Alkyl(C12-14) ethylbenzylammonium chloride (ADEBAC (C12-14))

Special advice

Always read the label and product information before use.
The suitability of the product with regard to its efficacy spectrum must be checked separately. The following applies to surface disinfectants: "Disinfectants differ, among other things, with regard to their efficacy spectrum on microorganisms. This must be taken into account when selecting a suitable preparation for the respective areas." Please note that cases are known of bacterial strains which show a reduced sensitivity or development of tolerance to disinfectants.**** Among other things, products based on quaternary ammonium compounds may not be sufficiently effective in these cases. For disinfection of surfaces in high-risk areas (such as intensive care, haematology-oncology, neonatology or burn units) schülke therefore recommends for example mikrozid® PAA+ wipes or mikrozid® AF wipes, which, due to their properties, cover a particularly broad spectrum of activity. Wearing protective gloves is advised. Further information is available on request.

Information for order

Item	Delivery form	Item no.
mikrozid® sensitive wipes Jumbo Refill 200 wipes	12 / carton(s)	on request
