

sensiva® Protective Cream

Protecting your hands for optimal skin health

Certain occupations have an increased requirement for hand care. In particular, healthcare workers have a higher exposure to water and other aqueous solutions through frequent hand washing, use of alcohol based hand rubs and the wearing of gloves. All this exposure has the ability to impair the barrier properties of the skin, especially on the hands.

Our plus

- effective protective cream¹
- fast absorbing
- helps to prevent skin irritations
- contains active ingredient hamamelis
- colour and perfume-free
- dermatologically tested

Application areas

- to be applied to clean, dry hands
- protects hands in wet environments (eg. frequent hand washing or working with cleaning solutions)
- added protection for vulnerable hands
- suitable under protective gloves

Product profile

- contains hamamelis extract (also known as witch hazel-extract) which protects the skin from external effects and reduces inflammation
- contains allantoin which has a soothing effect on the skin, moisturises and supports cell renewal

Instructions for use

Apply a small amount of sensiva® Protective Cream to the back of the hand and massage into the skin.

Pay special attention to the areas between the fingers and the nail bed.

sensiva® Protective Cream can be used regularly through the day.
