Protection and intensive care for irritated and sensitive skin

dermatologically
tested

octenisept[®] protect & repair cream

Our Plus

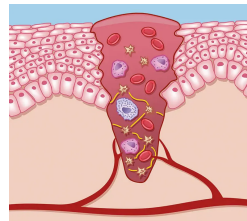

- Soothes stressed, dry or flaky skin
- Very good skin tolerability
- Soothes and protects skin that is stressed due to incontinence
- Compatible with octenisan[®] products (preventive washing)
- Panthenol promotes skin regeneration, ensures suppleness and elasticity
- Bisabolol has an anti-inflammatory and skin-soothing effect
- Free of fragrances and dyes
- Very well suited to the soothing care of and protection from nappy rash in children aged 6 months and over

Fields of application

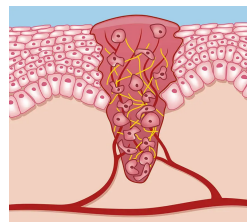

- Optimal supportive therapy in the wound healing process
- For the care of sensitive and irritated areas of skin, such as in the case of psoriasis or non-acute neurodermatitis
- For scar and tattoo care; for follow-up treatment of minor burns and sunburns
- Ideal for use in intensive care and incontinence patients

Instructions for Use

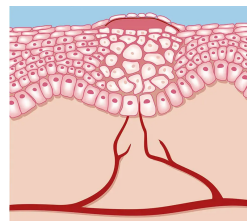

Apply a thin layer of cream to affected area of the skin and rub in gently. In case of a wound, the epithelialisation phase must be complete before using the cream. Apply cream 1-3 times a day to support the skin's natural regeneration process. Do not use the cream in the case of acute dermatitis! Do not use in case of hypersensitivity to any of the ingredients. Do not apply to large areas of skin. For hygiene reasons, never allow the tip of the cream tube to touch the epithelialised wound or other surfaces.
